Pacify farm walkthrough

Written by Mayonnaise/Jun 23, the 2020 Farm Mission has an alternate ending. When you feed all karen's poisonous chickens, then pick them up in the barrels and take them to the cemetery box. Now catch the pan and smack that chicken (mini boss spawns). Fight your boss and wait around the van. Congratulations you found the alt ending! It takes a little longer than the main ending, but it was fun for my friends and I in CO-OP mode. Game: Pacify Pacify Farm Update allows players to engage in a new mission on a new map. This quick guide eschasing how to find the secret completion of an update. Pacify is a horror game in which a player works for Paranormal Activity Helpers Incorporated (PAH) to get rid of the location of a supernatural unit. The basic game has the player enter an exceptionally old house to complete various objects in order to calm down and deal with the angry spirit of the little girl who will chase the player(s). But the farm update added a whole new map to the game and combined it with a new enemy and new targets. As in the base game, there is a secret ending available for players to find. So here's a quick guide on how to find it. Overpower farmer in Pacification As with any ending, the first thing a player has to do is defeat the monster and (preferably) combine clues that allud to the origins of the monster. These tips mention a box that can be used to trap evil, that water is needed to make the poison effective, an old trifle that can activate magic in a windmill, etc. But the first thing players have to do is to enter the house. On the first or second floor of the house there should be some screw knives that can be used to open the door all over the map. This includes the barn where the poison is located. In the attic there is an old trifle listed in one of the notes. It is a statue of an angel who, when taken to a windmill, can heal wounded allies. In addition, grab one of the pans from inside the kitchen to kill the chickens later. Behind the house there is a freshwater source that can be activated. This is the source of water players must dump poison in order to create green chickens. These green chickens can then be served to the farmer to start weakening it. When enough green chickens were fed to the farmer she gave away a wing and began to slowly limp towards the rebirth area where she would eventually faint. Players will have to grab the bunch to move the farmer around. Here, players can choose which ending they want to complete. Triggering Secret Ending in Pacify So remember that box listed in your notes? The one who said he trapped evil and probably the field where the voracious husband of the spirit held? It is located in a cemetery near the windmill. Take the farmer to this box. It probably siphons the evil spirit of cyatry inside the box and seals it. After that, the secret ending can be by simply returning to the van empty-handed. But interesting fact: there is a Fight the Easter egg available with this ending. Bringing the farmer to the sealing box, place the green chicken in it. Then a small light show shouldn't be - no joke - a giant green chicken on the farm. It is large, neon green and comically defenseless. The biggest problem should be catching up because it works so fast. But like other chickens on the farm, the way to defeat this creature is to hit it with a frying pan. Although, for obvious reasons, this chicken will require a lot of whacking in front of it kill. But when the chicken boss clucks off for the final rest, players can then still get closer to the van and find their secret ending. More: World of Horror: Access All Mystery Endings Pacify is available on Windows computers via steam. This animal crossing Pokémon Battle is a perfectly done related topic about author Paige McMullen (92 articles published) more from Paige McMullen How to Beat the Farm (new update)! By Swifty Farm Update Guide! Step 1: Find the screw shears in the house in front of you, as soon as you get in the game, you will be on the 2nd or 3rd floor (depending on the rebirth)Step 2: Find the Angel Statue on the top floor of the house, before spawning (It will be used to revive/help people who have been caught by the farmer)Step 3: Go around the map opening door that need a bolt knife (such as barn doors and doors that have fertilizer bags)Step 4: Now... there is an area at the back corner of the barn where the water source is located, you need to click E on it and it will get you some water. So after that you should run and grab fertilizer bags from a mini house/shed near spawning and poison the water. Step 5: Almost there... Now you need to grab the pan from the kitchen of the house near spawning and hit any chickens around you and pick it up. Then you will put the chicken in poisonous water and bathe the farmer to eat it. (This will weaken it!) Step 6: After feeding the farmer 8/9 poisonous chickens, the farmer will fall to the floor near the spawning and you need to use a barrel to escort him to the van. (And then you win!) ps Sorry if it is not detailed enough ... I rushed a little to write this whole guide, / , /
